

OUTPATIENT SERVICES

For more than 30 years, Devereux Advanced Behavioral Health Florida has been one of the state's most comprehensive child welfare and behavioral healthcare organizations. We serve individuals with intellectual and developmental disabilities, mental health differences, behavioral health differences – including autism spectrum disorder – and we have the unique ability to address a combination of these needs through our dual diagnosis specialty.

As part of our continuum of care, Devereux Florida's **Outpatient Therapy program** throughout Volusia County provides the following therapeutic services to individuals, ages four to 18:

- Individual therapy
- Family therapy
- Group therapy

In addition, our Volusia Counseling Center offers medication management services to clients who are open to participating in therapy. *Note:* A child open to counseling can receive a psychiatric evaluation and monthly medication management services to manage medication needs.

Our experienced and caring clinicians provide outpatient therapy services in an individual's home and school, as well as in an office setting. Typically, a child/adolescent is seen for one hour on a weekly basis. Devereux Florida team members are trained to work with youth dealing with grief/loss, divorce, social skill deficits, difficulty with coping skills, mood disorders like depression/anxiety, and other areas.

Additional program information:

- **How we receive referrals:** The majority of referrals come through our partner schools and guidance counselors. Other referring parties: parents/local foster parents, medical offices, the Department of Children and Families and the Community Partnership for Children.
- **Accepted Medicaid plans:** Sunshine/Cenpatico, Wellcare/Staywell, United Health Care, Children's Medical Services, Magellan Complete Care, Amerigroup, United Health Care Healthy Kids, Staywell Kids and Molina.
