Why We Make A DIFFERENCE

ABOUT HEALTHY SCHOOLS

Healthy Schools LLC is a healthcare access company that promotes the health of children by administering nasal inhaled influenza vaccines at their schools. We create public/private partnerships with the county health and education departments to provide this service at no cost to the schools. Healthy Schools provides all the required staffing and paperwork necessary for the program. In addition, Healthy Schools appropriately supplies vaccine from private supplies or from VFC supplies, as applicable. Healthy Schools is a registered provider with the State of Florida and is an appropriately certified provider in Florida's Medicaid program. Healthy Schools reports all vaccines to the State of Florida SHOTS program. We are the only private company in Florida currently operating this type of program.

WHY GET VACCINATED?

It is recommended by the CDC that all persons aged 6-months and older receive a flu vaccine every year. The financial burden of Influenza in the US annually is estimated at \$10.4b. On average 36,000 deaths are attributed to Influenza annually in the US. In 2012/13 flu season, only 34.1% of the persons 6-months and older in Florida were vaccinated with flu vaccine, which represented the worst flu vaccination rate in the US. Since 100% are recommended to be vaccinated, the market is clearly lacking effective ways to get vaccine to the population. Bringing flu vaccines into the schools has proven to be an effective way to increase the vaccination rates for children in Florida.

HOW WE OPERATE

Healthy Schools establishes a partnership with a local health department and school district prior to administering vaccines, Healthy Schools selects a day to come in and vaccinate the students. Prior to that day, Healthy Schools sends consent forms home with students. Insurance information is captured on the form. For those students with appropriately completed consent forms, a Healthy Schools' nurse administers the flu mist vaccine. For students eligible for VFC, the vaccine is administered from that supply, and Healthy Schools bills the appropriate plan for the administration services. For non-VFC eligible members, Healthy Schools administers privately purchased vaccine. Healthy Schools bills the insurance company for the vaccine and the administration services. No students, schools or parents are billed for these services. Healthy Schools then submits a report of all services to the State of Florida SHOTS database.

OUR FOUNDER

Tony Boselli
Former Player
Jacksonville Jaguars

“The in-school flu vaccination program works and STOPS the flu in its tracks. Join me in encouraging all of our children to be properly vaccinated and help TEACH FLU A LESSON.”
