

## Adding a YouTube video to a page

Copy imbedded code to a .txt file. Upload into Document folder on website. Open .txt file to get its URL. Copy.

Insert -> Web Part ->Media and Content -> Content Editor -> Click Add

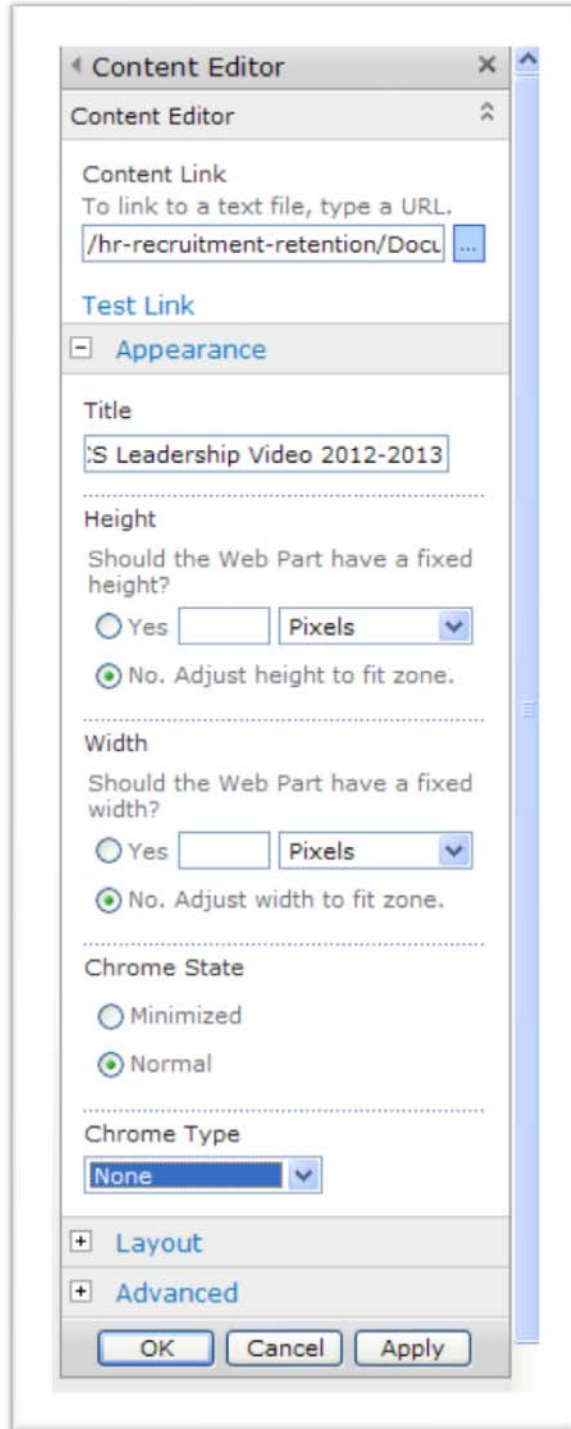

Click down arrow – Select Edit Web Part.

Paste the URL from .txt. file in the Content Link text box. Remove <http://content.volusia.k12.fl.us>, leaving just the department name/Document folder/.txt file.

Add the Title under Appearance.

Change Chrome type to NONE. Click Apply – OK.
